

Safer schools start with Sine

A new school of thought
for managing visitors

Sine has overall improved
our visitor management
and given us much-needed
peace of mind.

When it comes to school safety, paper-based visitor management processes are not reliable enough. With the Sine digital visitor management system, you can help manage security access on campus while enhancing peace of mind for students, staff and parents.

- ✓ Increase awareness of which visitors have registered and are on campus
- ✓ Screen visitors against predator and criminal databases
- ✓ Respond quickly to security issues with mass notifications
- ✓ Accurately track and report on all visitor data

HOW THE SINE VISITOR MANAGEMENT SYSTEM PROTECTS YOUR FACILITIES

Strengthen security:

- ✓ **Watchlists** - Create custom "allowed" and "watched" visitor lists. Automatically screen entrants and block entry to any unwanted, watch-listed individuals.
- ✓ **U.S. Offender Screening** - Instantly screen all visitors against the U.S. offender registry at check-in.
- ✓ **Instant Badge Printing** - Print visitor badges when a visitor arrives on campus for quick and accurate identification.

Prepare yourself and others:

- ✓ **Mass Notifications** - Promptly notify visitors and staff in case of a drill or real emergency and print or email evacuation lists of all active passes on site.
- ✓ **Custom Visitor Types** - Choose from multiple visitor types or create your own custom labels. Each visitor type can trigger a different entry process within a specific site or zone.

Go digital and gain a system of record:

- ✓ **Comprehensive Reporting** - Generate custom reports by facility, name, purpose of visit, or any search criteria you need.
- ✓ **Compliance confidence** - Capture and manage important documentation like permits and licenses to ensure campus compliance.

Around-the-clock support

- ✓ Phone, email, and live chat available 24 hours a day
- ✓ Instant web dashboard and in-app support
- ✓ Talk to a real person instead of bots
